

LEADERSHIP EDITION

Turn Raw Data into Funding & Programming Decisions.

Stop guessing which programs work. Start seeing the long-term impact of your investments.

Three Questions You Can Finally Answer

- 1 Is our equity work working?**
Instantly disaggregate college persistence rates by race, gender, and income to spot exactly where opportunity gaps open up after graduation.
- 2 Which investments yield ROI?**
Use the Program Impact dashboard to compare outcomes for students in CTE, Dual Credit, or AVID vs. the general population.
- 3 Where do our students succeed?**
Stop relying on anecdotal “college acceptance” data. See real completion data to build stronger partnerships with colleges that serve your students well.

THE CHALLENGE

You have mountains of data: National Student Clearinghouse files, SIS records, and program rosters. But merging them to answer simple questions like “Did our AVID students actually finish college?” requires weeks of manual labor or expensive consultants.

THE FOYOST SOLUTION

FOYOST (Follow Your Student) is a secure, dashboard that combines your local student context with national outcome data. It provides a single source of truth for post-secondary success, allowing you to move from “data wrangling” to strategic action immediately.

The Bottom Line for Leadership

- **Zero Integration Lift.** No API required. No strain on your IT team. WSIPC does the data imports.
- **Secure & Compliant.** Hosted by WSIPC in Microsoft Azure with full FERPA compliance.
- **Fully Funded.** Year 1 onboarding is fully funded. No budget required to get started.

Let’s look at your district’s data. Schedule a 20-minute demo today. Scan the QR code or visit followyourstudent.org.
